

# Ostrander Point Wind Energy Park

## Construction and Post-construction Monitoring

### Construction

- Vegetation clearing will occur within designated areas only.
- Aquatic habitats to be monitored to ensure compliance with specifications, site plans and/or permits.
- Ensure compliance with the Alvar Management Plan.

### Post-Construction

- Bird and bat mortality monitoring for a period of three years.
- Ongoing hydrological monitoring.
- Disturbance effects monitoring to amphibians and breeding birds.

### Mitigation

- Based on the on-going results of the post-construction monitoring, mitigation measures may require implementation including operational controls (e.g. turbine shutdown).
